

Rust Environment — Onboarding

Get your Rust toolchain ready for production development.

1 Install Rust

Visit the official installer page and follow the instructions for your OS:

rust-lang.org/tools/install

This installs **rustup**, **rustc**, and **cargo**.

Install Rust

Using rustup (Recommended)

It looks like you're running macOS, Linux, or another Unix-like OS. To download Rustup and install Rust, run the following in your terminal, then follow the on-screen instructions. See "Other Installation Methods" if you are on Windows.

```
curl --proto '=https' --tlsv1.2 -sSf https://sh.rustup.rs | sh
```

2 Install cargo-binstall

Installs pre-built binaries instead of compiling from source — significantly faster.

```
cargo install cargo-binstall
```

3 Install CLI Tools

Run each command to install the required tooling:

```
cargo install bindgen-cli
```

C/C++ binding generator

```
cargo install cargo-leptos
```

Leptos full-stack framework CLI

```
cargo install just
```

Command runner (Makefile alternative)

```
cargo install leptosfmt
```

Leptos RSX formatter

```
cargo install sqlx-cli
```

SQLx migrations & query CLI

```
cargo install tauri-cli
```

Tauri desktop app CLI

```
cargo install tokei
```

Code statistics & line counter

```
cargo install typos-cli
```

Source code spell checker

```
cargo install ui-cli
```

UI component installer

```
cargo install wasm-bindgen-cli
```

WebAssembly JS bindings generator

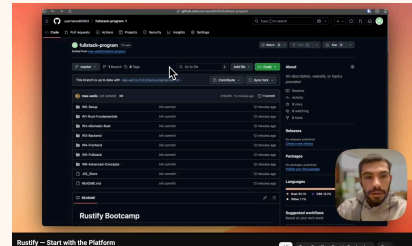

Get Started with Rustify

Follow these two steps to access your dashboard.

A Watch the Onboarding Video

Start here — the video walks you through the platform and what to expect:

youtube.com/watch?v=qfAA2yQhL9Y

B Connect to Your Dashboard

Go to the platform and sign in to access your personal dashboard:

rustify.rs

→ Connect to Dashboard

C Join the Discord Community

Join the private Discord server to connect with the cohort:

discord.gg/mbszS27TqA

Once you've joined, **send me your Discord username** so I can add you to the private channels.
